

EDITORIAL

Journal of Research in Dentistry (JRD) was conceived by its editors to be a prominent global journal, seeking quality, improvement, and breakthrough advances in oral sciences and related fields, through the widespread dissemination of research, assured by fine peer-review from a highly qualified editorial board.

JRD will be a broad-spectrum information source, aiming at improving the understanding of science, and to bridge the gap between basic science and clinical management for dentists, students and researchers from related areas.

JRD shall also expand knowledge on daily practice procedures and novel treatment modalities, especially those aiming at improving patient's quality of life.
