

PRINT HYPERMEDIA PRESENTATION OF CINEMORPHICS, SELF SHIFTING AND META- IDENTITY

Charles Webb*

Abstract: Since the specific topic of the articles for the current dossier is *Language: Hypermedia in printed media*, I have composed the article itself using print hypermedia, specifically, QR code. Using either iPhone, Android or other QR code reading apps to scan printed pages, one can access videos, images, web pages, text, etc., which contains the content of the article. I have also included the urls for these QR code links, for easy access when reading the article directly on tablets or desktops rather than from the printed page. If urls do not click through, please copy/paste into address bar for access. It is important, in order to gain the full effect of the article, for the reader to access the topics in order, and read or watch all of the content in each before moving on to the next. Skipping around may be amusing, but the order of presentation and the nature of the media contained in each topic is crucial to obtaining the combined effect of both the content itself and this approach to content presentation.

Keywords: Cinemorphics. Selfshifting. Meta-identity. Print hypermedia. QR code.

Resumo: Uma vez que o tema em específico dos artigos para o dossier atual é *Linguagem: Hipermídia em mídia impressa*, eu desenvolvi o artigo usando hypermedia impressa, especificamente, código QR. Usando o iPhone, Android ou outros aplicativos de leitura de código QR para digitalizar páginas impressas é possível acessar vídeos, imagens, páginas da web, texto, etc., que contém o conteúdo do artigo. Também inclui as URLs para esses links de código QR, para facilitar o acesso ao ler o artigo diretamente em tablets ou desktops ao invés de páginas impressas. Se as URLs não clicarem, copie e cole na barra de endereços para acesso. É importante, para obter o pleno efeito do artigo que o leitor acesse os tópicos em ordem, e leia ou assista todo o conteúdo em cada um antes de passar para o próximo. Passar alguns tópicos adiante pode ser divertido, mas a ordem de apresentação e a natureza dos meios de comunicação contidos em cada tópico são cruciais para a obtenção do efeito combinado de ambos os conteúdos e esta abordagem para a apresentação de conteúdo.

Palavras-chave: Cinema. Automudança. Meta-identidade. Hypermedia impressa. Código QR.

14. Conclusions

The use of print hypermedia may significantly augment the implementation of Cinemorphic method when presented in print media.

Additionally, print hypermedia, specifically QR Code, is an effective and efficient tool for the presentation of large amounts of different forms of content (video, images, text, etc.) in journal articles and other print media.
